

## M1605

### Portable and easy to use

The M1605 Sewing Machine is a lightweight and portable machine, ideal for taking to sewing classes or sewing in smaller spaces. With pre-set stitch length and width, the machine will be easy to use, even for beginners. Whether you're sewing new fashion garments, creating unique quilts or simply mending, the machine will be a great choice. There are six basic stitches featured, for key sewing techniques. You'll have the straight stitch, zigzag, blind hem stitch, multi-step zigzag, decorative scallop and a four-step buttonhole. The machine also provides easy stitch selection, with a stitch selector dial that can be turned to suit your task.

You'll also have adjustable thread tension to fine-tune the look of your stitch. There is an extra high presser foot lift to offer more clearance under the presser foot, ideal for thick fabrics or layers. Additionally, the long-lasting LED provides bright illumination of your sewing area for best results and accuracy as you work. Simple-to-follow threading guides for winding the bobbin and threading the upper thread are conveniently marked on the machine.
